

My name is Joseph Cohen and I am a Truck Driver. Driving down the highways sometimes I cannot get the weather and traffic on the radio for there is no tower nearby. With the XM Radio I can get all the weather and local traffic information so as I will not have to worry about backups or accidents. XM Radio gives you weather updates all over the country, therefore as a truck driver you know what kind of weather you will be driving into. Local radio stations do not give you this information. XM Radio also give you updates every five minutes no other radio does this. XM Radio also give traffic updates where other radio stations do not. XM Radio also give weather updates in other areas so as we are able to take other routes if necessary to avoid bad weather. We do not live in Russia, we live in the USA. Keep XM Radio alive. GOD BLESS AMERICA. Thank you sincerely, Joseph Cohen
